RELEASE DATE 06/23/2023

INS-2819-00

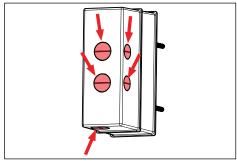

#### Standard Installation

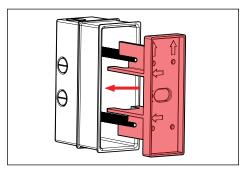

## Phase 1 - Rough in

 Remove 4 wing nuts and plastic sleeve from housing and save for later use.

 Knock out one of the knockouts on the back or side of the housing and install conduit.

Insert plastic sleeve into housing previously removed on step 1.

 Drill four 1/4" holes at desired position on concrete form. Please use 1-1 template provided on page 4.

 Insert all-treads through the four 1/4" holes drilled on the concrete form and install in to the housing. Then hand tighten the 4 wing nuts previously removed in step 1.

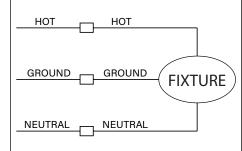

### Phase 2 - Finish Installation

Remove plastic sleeve and all-threads by removing wing nuts.

- 2. Remove faceplate from fixture by lifting from the bottom up and save for later use.
- 3. Twist heatsink forward in order to expose screws in the back.

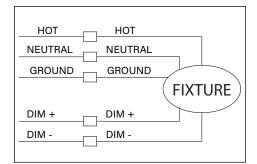

- 4. Make watertight connections from line voltage to fixture leads using waterproof wire connectors.
- All line voltage connections must be made in compliance with the National Electrical Code. Failure to do so will void warranty.

## IMPORTANT SAFETY INFORMATION LISTED ON REVERSE READ, FOLLOW, AND SAVE ALL SAFETY AND INSTALLATION INSTRUCTIONS

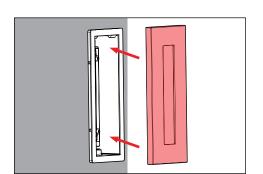

### Standard Installation

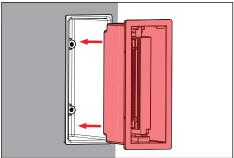

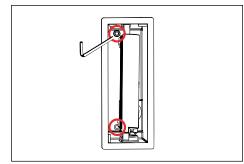

All line voltage connections must be made in compliance with the National Electrical Code. Failure to do so will void warranty.

8. Attach faceplate previously removed on Step 2.

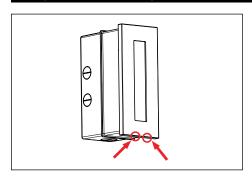

5. Once wiring is completed insert fixture into housing.

- 6. Hand tighten screws using a 5/32" allen wrench.
- 7. Rotate heatsink/LED assembly back to marked position or desired position.

## **Tamper Resistant Option**

 Tighen two #8-32 stainless steel set screws at the bottom of the faceplate with a 5/64" allen wrench.
