# **SPECIFICATIONS**

| ELECTRICAL                 | WATTAGE           | 14.5W Laser   |
|----------------------------|-------------------|---|
|                            | LASER             | Integrated modular design with electrical disconnects allow for easy field upgrade and maintenance.   |
|                            | OPERATING VOLTAGE | 120-277VAC  |
|                            | DRIVER            | With one (1) 1500mA, Class II, constant current integral driver. 50/60Hz. >0.9 Power Factor,5A in-rush current (typical at 120VAC), ≤20%THD (nominal at 120VAC full load). Output over-voltage, over-current, and short circuit protection with auto recovery.  |
|                            | WIRING            | 18GA Stranded, XLPE, 150°C, 600V wire.  |
| PHYSICAL                   | MATERIALS         | Furnished in copper-free aluminum (6061-T6).  |
|                            | BODY              | Unibody design is fully machined from solid billet and provides enclosed, water-proof wireway and integral heat sink for maximum component life. Integral knuckle for maximum mechanical strength. High temperature, silicone 'O' Ring provides water-tight seal.   |
|                            | CAP               | Fully machined and offered with both tool-less and tamper-resistant options. Tool-less is the standard offering. Select "Tamper Resistant" option for one (1) set screw to secure the cap.  |
|                            | OPTICS            | Interchangeable optics permit changes in the field.   |
|                            | LENS              | Shock resistant, tempered, 1/8" thick soda lime glass lens is factory adhered to fixture cap and provides hermetically sealed optical compartment.  |
|                            | KNUCKLE           | Features a mechanical taper-lock, without the use of serrated teeth, which inherently limit aiming. High temperature, silicone 'O' Ring provides water-tight seal and compressive resistance to maintain fixture position. Design withstands 73lb. static load prior to movement to ensure decades of optical alignment. 1/2" pipe thread for mounting. |
|                            | HARDWARE          | LOCK aiming screw is black oxide treated for additional corrosion resistance.   |
|                            | FINISH            | StarGuard, our 15-stage chromate-free process, cleans and conversion coats aluminum components prior to application of Class 'A' TGIC polyester powder coating, and it is RoHS compliant.   |
|                            | WARRANTY          | 5-year limited warranty.  |
